Yasir Arafat

Frontend Developer

GitHub | LinkedIn | iamyasir.arafat01@gmail.com | +8801828044629

SUMMARY

Frontend Developer specializing in building high-performance, scalable, and visually polished web applications. Skilled in HTML, CSS, Tailwind CSS, React, Next.js, and TypeScript, with a strong focus on clean architecture, reusable components, responsive design, user accessibility and performance optimization. Experienced in RESTful APIs, JWT authentication, Firebase, Redux Toolkit, and version control with Git/GitHub. Known for delivering production-ready interfaces with strong UI/UX awareness, efficient problem-solving ability, and continuous learning. Looking to contribute reliable, modern frontend solutions to innovative teams.

SKILLS

- **Languages:** HTML, CSS, JavaScript (ES6+), TypeScript, C, C++
- **Frameworks & Libraries:** Tailwind CSS, React, Next.js, React Router, Redux Toolkit, Material UI, Shadcn, Styled Components, GSAP
- **Tools & Platforms:** Git, GitHub, VS Code, Figma, Postman, Vercel, Netlify, Inngest, Firebase, Supabase, Cloudinary
- **Soft Skills:** Problem-Solving, UI/UX Awareness, Attention to detail, Clean Coding, Communication

RELEVANT EXPERIENCE

NextStep — AI Career SaaS Platform

Tech Stack: *Next.js, TypeScript, Tailwind CSS, Shadcn, NextAuth, MongoDB, Mongoose, Stripe, Inngest, Cloudinary, Web3Forms*

- Built an end-to-end AI-powered career SaaS platform supporting job description analysis, resume building & optimization to help early-career users land their dream job 25-30% faster.
- Designed a responsive, mobile-first UI using Tailwind CSS and Shadcn, featuring interactive charts, reusable components, and a clean, consistent user experience.
- Implemented Next.js SSR (Server-side Rendering), SSG and ISR for faster load times, TypeScript for type-safe maintainability, and performance optimizations that increased overall efficiency by 18%.

e-shop — Modern E-commerce Platform

Tech Stack: *React, Redux Toolkit, Tailwind CSS, Firebase, RESTful APIs, Express.js, Stripe*

- Developed a fully responsive, mobile-first e-commerce platform utilizing Tailwind CSS and reusable React components, resulting in clean layouts and a consistent, high-quality UI/UX.
- Implemented secure user authentication with Firebase and integrated RESTful APIs for dynamic product data. Managed global application state using Redux Toolkit to ensure predictable and scalable data flow.
- Optimized user experience by implementing pagination, filtering, debounced search, lazy loading, image compression, interactive cart features, loading states, and code-splitting — achieving a 20% increase in overall performance.

Signalist — Stock Market Application

Tech Stack: *Next.js, TypeScript, Tailwind CSS, Shadcn, MongoDB, Mongoose, Inngest, Better-Auth, RESTful APIs*

- Developed a responsive, mobile-first stock market application using Tailwind CSS, and Shadcn. Featuring interactive charts, heatmaps, reusable components, and a clean UI optimized for across devices.
- Implemented secure authentication with Better-Auth. Integrated Inngest to automate sending AI-generated daily stock news summaries to users by email.
- Optimized Next.js data fetching, server components, and render logic (SSR / SSG / ISR). Maintained type safety with TypeScript and runned background workflows using Inngest to give a performance boost up to 20%.

EDUCATION

- **Mirpur Government High School — (SSC)**
  2025 - Dhaka, Bangladesh
